

Meggitt Sensing Systems

Custom capabilities

Meggitt's capabilities provide the perfect fit for your unique vibration application.

Meggitt offers thousands of standard Wilcoxon Research® products for a variety of vibration applications. Our technical services department performs simple to complex modifications to existing products and custom product development. With our extensive expertise and technical advice, we provide complete monitoring solutions from rapid prototypes to manufacturing and delivery.

Common product modifications

- Packaging
- Output sensitivity
- Connector type
- Frequency response
- Custom bias output voltage
- Output type

Custom vibration applications

- External ship hull monitoring
- High-g rotating equipment
- Seabed seismic sensing
- Radiation 'hot-zone' monitoring
- Low-power wireless monitoring
- Retrofitting legacy products

Wilcoxon Research® products for custom design

- Industrial accelerometers
- 4-20 mA sensors and transmitters
- Cable assemblies
- Vibration shakers
- Hazardous area sensors
- Hydrophones
- Underwater, seismic and helicopter sensors
- Enclosures: switch, junction and termination boxes
